

TRIM™ MicroSol™ 568 NXT

PRTR Compliant Semisynthetic for Ferrous Machining

TRIM Microsol 568NXT is a state-of-the-art neosynthetic technology developed by Master Fluids Solution. The product is PRTR compliance with low foam property both soft and hard water. It is professionally designed to machine for ferrous and yellow metal alloys. Carbon steel is highly recommended for TRIM Microsol 568NXT.

MicroSol

For ultimate performance:

TRIM™ MicroSol™ semisynthetic microemulsion coolants deliver high-performance lubricity and ultimately lower costs. Achieve precision parts, exceptional tool life, extended sump life, assured regulatory compliance, and greater profitability with the MicroSol product just right for your production.

Designed to meet the rigorous demands of the aerospace, medical, automotive, and high production, precision parts manufacturing industries, there's a MicroSol to answer your concerns, ramp up your production, and boost your bottom line.

Choose MicroSol 568NXT:

- Well foam control even in soft water
- Great cleanliness and save time for maintainance
- Excellent lubricity performance and provide long-lasting toolife
- Does not contain any chemical listed under Japan PRTR regulation
- Highly compatible to carbon steel machining with excellent corrosion protection
- Improve the use of coolant and no extra biocide/fungicide for tankside treatment

MicroSol 568NXT especially for:

Applications — band sawing, boring, drilling, face milling, grinding, high-pressure, high-volume, milling, reaming, tapping, and turning

Metals — brass, bronze, carbon steel, composites, copper, gray cast iron, plastics, and steels

Industries — general machining

MicroSol 568NXT is free of — chlorine, DEA, PRTR materials, and sulfur

TRIM™ MicroSol™ 568 NXT

PRTR Compliant Semisynthetic for Ferrous Machining

Application Guidelines

- Running at or above 6.0% offers the best sump life and corrosion inhibition to protect machine tools and parts.
- Performs well where traditional soluble oils may not cool sufficiently.
- Not recommended for below 5% because of sump life and corrosion issue.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/ap/en-ap/distributors/index.php>, your District Sales Manager, or email us at apac-info@masterfluids.com.

Physical Properties Typical Data

Color (Concentrate)	Light Yellow to Amber
Color (Working Solution)	White translucent
Odor (Concentrate)	Mild
Form (Concentrate)	Liquid
Flash Point (Concentrate) (ASTM D93-08)	> 100°C
pH (Concentrate as Range)	9.5 - 10.0
pH (Typical Operating as Range)	9.0 - 10.0
Coolant Refractometer Factor	1.9

Recommended Metalworking Concentrations

Light Duty	5.0% - 6.5%
Moderate Duty	6.5% - 8.5%
Heavy Duty	8.5% - 15.0%
Design Concentration Range	5.0% - 15.0%

Concentration by % Brix

$\% \text{ Concentration} = \text{Refractive Reading} \times \text{Refractive Factor}$
Coolant Refractometer Factor % Brix = 1.9

TRIM™ MicroSol™ 568 NXT

PRTR Compliant Semisynthetic for Ferrous Machining

Mixing Instructions

- Recommended usage concentration in water: 5.0% - 15.0%.
- To help ensure the best possible working solution, add the required amount of concentrate to the required amount of water (never the reverse) and stir until uniformly mixed.
- Use premixed coolant as makeup to improve coolant performance and reduce coolant purchases. The makeup you select should balance the water evaporation rate with the coolant carryout rate. Use our Coolant Makeup Calculator to find the best ratio for your machine: apps.masterfluids.com/makeup/.
- Use mineral-free water to improve sump life and corrosion inhibition while reducing carryoff and concentrate usage.

Additional Information

- Use Master STAGES™ Whamex™ for a quick and thorough precleaning of your machine tool and coolant system.
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.
- TRIM™ and MicroSol™ are registered trademarks of Master Chemical Corporation d/b/a Master Fluid Solutions.
