

TRIM™ OGM100HF

High Flash Point Gear Grinding Oil

TRIM OGM100HF is a high-efficiency grinding oil composed of high-quality mineral oil and various high-quality oil additives. This product has good permeability and lubricity, and can be used in the grinding process of materials (especially gear grinding) like cast iron, alloy steel, stainless steel, etc. It is also suitable for various profile grinding, internal and external grinding, cutting, centerless grinding, and other grinding processes.

Straight Oils

Straight to the point-of-cut:

TRIM straight oils, used "straight up" without dilution of water, provide maximum lubricity. TRIM neat oils have super lubrication and extreme pressure ability, which effectively protects the tool, prolongs its service life, and can obtain extremely high workpiece precision and surface finish.

Depending on the specific product, some TRIM straight oils are a high-end blend of various base oils; while others contain extreme-pressure additives to control built-up edge and prolong tool life.

Get straight to the cut with TRIM straight oils.

Choose OGM100HF:

- Does not contain phosphorus or heavy metals, which protects the environment and reduces pollution
- Light color, low odor
- Good material compatibility
- Safe and non-irritating to the skin
- Produces good surface finishes
- Provides high-strength lubricity in various medium-to-heavy-duty machining operations
- Meets the cutting requirements of various machining operations: such as, automatic lathes, special machines, CNC lathes, and machining centers.

OGM100HF especially for:

Applications — centerless grinding and form grinding

Metals — cast iron, stainless steels, and steel alloys

Industries — automotive, general industry, and general machining

OGM100HF is free of — heavy metals and phosphorus

High Flash Point Gear Grinding Oil

Application Guidelines

- TRIM OGM100HF is designed to be used straight.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/ap/en-ap/distributors/index.php>, your District Sales Manager, or email us at apac-info@masterfluids.com.

Physical Properties Typical Data

Color	Yellow
Odor	Mild, pleasant
Form	Liquid
Flash Point	> 170°C
Viscosity	11.60 mm ² /s @40°C

Ordering Information

20-liter pail

204-liter drum
