

# TRIM™ TC 108

## Metalworking Fluid Defoamer

TRIM TC 108 is a highly effective tank side additive used to control foam in metalworking fluid systems.

### Additives

#### ***The troubleshooters:***

*As cutting and grinding fluids can start to break down over time, tank-side additives can solve a number of problems. There are TRIM tank-side additives compatible with most coolants to extend tap and tool life, improve mechanical lubricity, control built-up edge, prevent stained parts, control foam, stabilize the emulsion, and replenish dye.*

*Whatever your problems and concerns, ask your TRIM specialist if a tank-side additive could be the answer.*

#### **Choose TC 108:**

- Paintable
- Plateable

#### **TC 108 especially for:**

**Applications** — antifoam

#### **Health and Safety**

## Metalworking Fluid Defoamer

### Application Guidelines

- Start by adding 1 to 3 ounces of TC 108 per 100 gallons of solution (8 to 24 ml per 100 liters) to lower foam (100-200 ppm in tank side usage). You may find that using less than this will be effective in your system.
- Shake or stir well before adding. For best results, premix TC 108 in a separate container with working solution until it is water-thin. This mixture should be added just up-stream from the foam.
- The maximum amount of TC 108 in the system should not exceed 16 ounces per one hundred gallons (128 ml per 100 liters) of metalworking fluid. Using too much TC 108 can cause foam and/or form a residue on the machine, parts, or tools.
- Spraying premixed TC 108 directly onto the foam will also knock it down quickly.
- Do not freeze or store above 115°F (46°C).
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/ap/en-ap/distributors/index.php>, your District Sales Manager, or email us at [apac-info@masterfluids.com](mailto:apac-info@masterfluids.com).

### Additional Information

- Use Master STAGES™ Whamex™ for a quick and thorough precleaning of your machine tool and coolant system.
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.

### Physical Properties Typical Data

Color (Concentrate)	Opaque white
Odor (Concentrate)	Slight characteristic
Form (Concentrate)	Liquid
Flash Point (Concentrate) (ASTM D92-90)	> 107°C

### Ordering Information

20-liter pail

204-liter drum

1000-liter tote
