

TRIM[®] TC 204

Blue Dye

TRIM TC 204 is a water-soluble blue dye. The product is used tank side to replenish depleted dye in water-soluble products or to color undyed products.

Additives

The troubleshooters:

As cutting and grinding fluids can start to break down over time, tank-side additives can solve a number of problems. There are TRIM tank-side additives compatible with most coolants to extend tap and tool life, improve mechanical lubricity, control built-up edge, prevent stained parts, control foam, stabilize the emulsion, and replenish dye.

Whatever your problems and concerns, ask your TRIM specialist if a tank-side additive could be the answer.

Choose TC 204:

- Blue dye
- Water soluble
