

# TRIM™ MicroSol™ 585XT

**Extended-life, Nonchlorinated Semisynthetic**

TRIM MicroSol 585XT is a high-lubricity, semisynthetic, microemulsion coolant. The formula delivers extended sump life and better foam control versus previous generation semisynthetics. It provides excellent cooling and mechanical lubricity, along with the machine-friendly characteristics you expect from a premium TRIM coolant. While it is particularly well suited for machining and grinding gray iron, it does very well in mixed metal situations. MicroSol 585XT has proven to be an exceptional machining fluid for titanium alloys.

## **Boiler Manufacturer Eliminates Rust, Odor, and Fluid Waste with TRIM™ MicroSol™ 585XT**

*The customer is a multinational company based in India that specializes in all aspects of manufacturing supercritical boilers and pulverisers. Formed in 2007, the firm's expertise encompasses design, engineering, selling, maintenance and servicing of their products. They have built one of the most state-of-the-art plants in India, with an optimized layout, machinery, and systems for maximum efficiency.*

## **Choose MicroSol 585XT:**

- Dramatically extends useful life without the need for tank-side biocides or fungicides
- Low foaming for today's demanding high-pressure, high-volume applications
- Compatible with a very wide range of material including cast iron, steels, copper, titanium, and aluminum alloys, and many plastics and composites
- Optimized combination of cooling and lubricity for titanium machining applications
- Provides superior corrosion inhibition on cast iron and eliminates "hot chip" and clinking problems
- Excellent alternative to chlorinated soluble oils on high-silica aluminum alloys
- Contains no nitrites, triazines, phenols, and chlorinated or sulfurized EP additives
- Provides superior corrosion inhibition on all ferrous and nonferrous metals
- Keeps machines very clean while leaving a soft fluid film for ease of cleaning and reduced maintenance
- Uses standard metalworking recycling and disposal techniques

## **MicroSol 585XT especially for:**

**Applications** — band sawing, belt grinding, Blanchard grinding, corrosion inhibition, cutting, cylindrical form grinding, double disc grinding, drilling, grinding, high-pressure, high-volume, in-feed centerless grinding, internal grinding, plain grinding, reaming, roll threading, surface grinding, surface milling, tapping, thread forming, through-feed centerless grinding, and turning

**Metals** — 6000 series aluminum, aerospace aluminum alloys, aluminum alloys, brass, bronze, cast aluminum, cast iron, composites, copper, exotic alloys, ferrous metals, glass, gray cast iron, heat-treated steel, high-carbon steel, high-nickel alloys, nonferrous metals, plastics, stainless steels, steels, titanium, titanium alloys, tool steels, wrought aluminum, and yellow metals

**Industries** — aerospace, compressor, energy, firearms, machine tool, and medical

**MicroSol 585XT is free of** — chlorinated EP additives, formaldehyde releasers, nitrites, phenols, and sulfurized EP additives

# TRIM™ MicroSol™ 585XT

**Extended-life, Nonchlorinated Semisynthetic**

## Application Guidelines

- MicroSol 585XT performs well where traditional soluble oils may not cool sufficiently.
- In mixed-metal situations, concentration control is critical to fight galvanic corrosion (7,5%; plus).
- Running at or above 7,5% offers the best sump life and corrosion inhibition on cast iron chips.
- MicroSol 585XT is not recommended for use on very reactive metals such as magnesium.
- For additional product application information, including performance optimization, please contact your Master Fluid Solutions' Authorized Distributor at <https://www.masterfluids.com/vnm/en-vnm/distributors/index.php>, your District Sales Manager, or email us at [vieta-info@masterfluids.com](mailto:vieta-info@masterfluids.com).

## Physical Properties Typical Data

Color (Concentrate)	Yellow
Color (Working Solution)	White microemulsion
Odor (Concentrate)	Mild
Form (Concentrate)	Liquid
Flash Point (Concentrate) (ASTM D93-08)	> 120°C
pH (Concentrate as Range)	9,3 - 10,3
pH (Typical Operating as Range)	9,0 - 10,0
Coolant Refractometer Factor	1,2

## Recommended Metalworking Concentrations

Light Duty	4,0% - 6,5%
Moderate Duty	6,5% - 8,5%
Heavy Duty	8,5% - 10,0%
Design Concentration Range	4,0% - 10,0%

## Concentration by % Brix

$\% \text{ Concentration} = \text{Refractive Reading} \times \text{Refractive Factor}$   
Coolant Refractometer Factor % Brix = 1,2

## Health and Safety

Request SDS

# TRIM™ MicroSol™ 585XT

**Extended-life, Nonchlorinated Semisynthetic**

## Mixing Instructions

- Recommended usage concentration in water: 4,0% - 10,0%.
- To help ensure the best possible working solution, add the required amount of concentrate to the required amount of water (never the reverse) and stir until uniformly mixed.
- Use premixed coolant as makeup to improve coolant performance and reduce coolant purchases. The makeup you select should balance the water evaporation rate with the coolant carryout rate. Use our Coolant Makeup Calculator to find the best ratio for your machine: [apps.masterfluids.com/makeup/](https://apps.masterfluids.com/makeup/).
- Use mineral-free water to improve sump life and corrosion inhibition while reducing carryoff and concentrate usage.

## Ordering Information

20-liter pail

204-liter drum

1000-liter tote

## Additional Information

- Use Master STAGES™ Whamex™ for a quick and thorough precleaning of your machine tool and coolant system.
- Consult Master Fluid Solutions before using on any metals or applications not specifically recommended.
- This product should not be mixed with other metalworking fluids or metalworking fluid additives, except as recommended by Master Fluid Solutions, as this may reduce overall performance, result in adverse health effects, or damage the machine tool and parts. If contamination occurs, please contact Master Fluid Solutions for recommended action.
